TASK:

Dear partners in Learn STEM,

please, identify the most relevant key stakeholders with regard to STEM in your country.

These stakeholders should be addressed and informed about the project by you. Moreover, it would be great, if you could select those stakeholders that can be involved in defining, planning and implementing and assessing innovative approaches concerning STEM.

Fill in the table below with the stakeholders for your country.

It would be great if you could provide at least 10 key stakeholders.

Kind regards,
Rasmus
